

WATCHGUARD FIREWALL AND CONTENT FILTERING

Fast, effective and widely deployable Unified Threat Manager visibility tools for your virtual environment.

Network threats can strike at any time and can have irreparable affects on your business before you've even realised that they're there. The importance of enterprise network protection should therefore never be overlooked.

Watchguard solutions bring best-of-breed network security to your virtual environments and are uniquely architected to be the industry's smartest, fastest and most effective network security products. No matter the size, budget or complexity of your business, or whether it is virtual or physical device driven, Watchguard can cater for your ever-growing network security needs.

You can choose to deploy a mix of hardware and virtual appliances, operating together and managed from a common centralised management platform.

CIPHERFASTFACT

While many rack-mounted solutions can keep up with today's superfast fibre speeds, there are no tabletop security appliances available with this capability, especially while running Gateway Antivirus, Intrusion Prevention and Application Control all enabled.

BUSINESS BENEFITS
